

MICROPHONE

The TMC-102 have been designed adhering to a few essential design rules; simplicity, functionality and aesthetic. The TMC 101 chime microphone features a unidirectional gooseneck condenser microphone with a balanced output of -60 dB. The unit is suitable for paging applications that do not require a chime. It does not require any power supply but require phantom power to operate.

FEATURES

- Unidirectional gooseneck condenser microphone.
- A latching Talk button to activate microphone and also to trigger a dry contact output.
- Phone Jack microphone socket output with screw terminal connector for trigger contact.
