TNCO-01
NETWORK CONTROL OUTPUT

NETWORK SYSTEM

TNCO-01

The TNCO-01 provides a means of interfacing and triggering other third party equipment that are not network compliant. The unit provides 60 opto-coupler output trigger, which can be used to trigger external relays and devices.

FEATURES

- 60nos. opto-isolated digital dry contact outputs.

- Fully programmable outputs for interfacing with external devices and triggering relays.

Technical Specification

	TNCO-01
Network Interface	10/100 Mbps Ethernet TCP/IP
Indicators	Power
Control Input	60nos. Opto-coupler Control Output Sensors
Power Requirements	24Vdc (Regulated), 1.0A
Dimensions (W x H x D)	483 x 44 x 150 mm
